

FIELD PROGRAMMABLE PRINTED CIRCUIT BOARD

Amr M. Mohsen

ABSTRACT OF THE DISCLOSURE

A field programmable printed circuit board is provided which includes a multiplicity of component contacts for making electrical contact to the leads of electronic components to be mounted on the printed circuit board, a corresponding multiplicity of interconnect contacts for receipt of the leads on the package or packages of a programmable integrated circuit or circuits for interconnecting as desired the electronic components, and one or more layers of conductive traces formed on the printed circuit board, each conductive trace uniquely connecting electrically one component contact to one interconnect contact.

I hereby certify that this correspondence is being deposited with the United States Postal Service as Express mail in an envelope addressed to: Commissioner of Patents and Trademarks, Washington, D.C., 20231, on September 20, 1989. Express Mail No. RB143591371.

Date: 9/20, 1989.
